

AfroDJMac's Free Weekly Ableton Live Racks/Sample Packs

Instructions:

1. Open the Live Set (.als file)
2. You will find the instrument already loaded into one of the tracks.
3. Click the Save Icon on the top right of the rack (floppy disc icon)

4. Ableton will open the browser and save the preset to your library, automatically copying the samples files to your library.
5. Enjoy and tell your friends!

Instructions for Non Live users:

1. Open the folder and navigate to the "Samples" folder.
2. The raw audio files will be in the folder "Recorded."
3. On occasion, there may be audio files in folders called "Processed" or "Imported."
4. From there, you can open the audio files in your DAW of choice and chop/sample them however you wish.

Thanks for downloading, and please share any music you create using the racks or any of the audio files. Spread the word!
